

Download Critical Care Focus 3: Neurological Injury

Andrew Baker, medical director of the intensive care units in the Critical Care program at St. Michael's Hospital in Toronto, Ontario, Canada. ABOUT CONFERENCE. Conference Series LLC Ltd extends its welcome to 6 th Annual Congress on Emergency Nursing & Critical Care during July 11-12, 2019 Vienna, Austria with a theme “Exploring the Innovations and Advances in Nursing and Critical Care”. Conference Series LLC Ltd through its Open Access Initiative is committed to make genuine and reliable contributions to the scientific community. Neuroprotection is becoming an increasingly recognized and important part of critical care and perioperative medicine. As human beings survive increasingly severe life-threatening injuries and complex surgical interventions, it has become clear that neurologic injury and dysfunction is a primary driver of long-term outcome and disability. Intensive and Critical Care. Intensive and critical care is designed to help people recover from life-threatening injuries or illnesses. It's a high level of care that includes around-the-clock monitoring inside an intensive care unit or similar hospital environment.
