

# Download Human Odyssey : Four Million Years Of Human Evolution

Human evolution is the evolutionary process that led to the emergence of anatomically modern humans, beginning with the evolutionary history of primates—in particular genus *Homo*—and leading to the emergence of *Homo sapiens* as a distinct species of the hominid family, the great apes. This process involved the gradual development of traits such as human bipedalism and language, as well as ... In common usage, the word "human" generally refers to the only extant species of the genus *Homo*—anatomically and behaviorally modern *Homo sapiens*.. In scientific terms, the meanings of "hominid" and "hominin" have changed during the recent decades with advances in the discovery and study of the fossil ancestors of modern humans. The previously clear boundary between humans and apes has ... The Evolution Of Human Evolution - Human evolution began in Africa six million years ago, it describes the process of our ancestors went through to ultimately become the modern humans we are today. Transitionals in the Human Fossil Series [www.talkorigins.org](http://www.talkorigins.org) is an outstanding website. The artwork below, depicting a series of human skulls, came from there. Their larger version of the artwork is prettier, and they have many pages on their website regarding human evolution and this fossil series.
